**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/16/02 has been entered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 11 recites the limitation "said absorbent material" in line 3. There is insufficient antecedent basis for this limitation in the claim. The applicant has changed "absorbent" to "adsorbent" in the claim, therefore "said absorbent material" does not have support earlier in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3761

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3, 5, 7-10, 15-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Murphy (5,635,196).
7. With respect to Claims 1, 3, 11, and 15: Murphy discloses the use of an odor controlling substance where gluteraldehyde is impregnated into a silica desiccant (Column 2, lines 37-64).
8. With respect to Claims 5, 7, 16, 17, and 18: These claims are rejected as being directed to a non-selected species of the Markush groups in Claims 1 and 11.
9. With respect to Claims 8 and 19: Murphy discloses the same material that is claimed in the independent claims, therefore it is the examiner's position that the pH of the particles, are inherently  $7.0 \pm 0.5$ .
10. With respect to Claims 9 and 20: Gluteraldehyde has two aldehyde groups (two double bonded oxygens) in its structure, (one at each end), therefore having more than one active group.
11. With respect to Claims 10 and 21: Murphy discloses the material above as desiccant particles. The examiner considers the fact that there is more than one desiccant particle disclosed, there is more than one material present. (column 2, lines 37-64).

### ***Claim Rejections - 35 USC § 103***

12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

13. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

14. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Karapasha (5,407,442) in view of Murphy (5,635,196).

15. Karapasha, discloses the use of an absorbent article such as a pantiliner (column 24, lines 28-30), that has a silica based odor absorbent compound included (see abstract). However, Karapasha fails to disclose the use of an adsorption material that is doped with at least one dopant. Murphy discloses the use of an odor controlling substance where gluteraldehyde (dopant) is impregnated (doped) into a silica desiccant (adsorption material) (Column 2, lines 37-64). It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the silica based odor absorbent composition of Karapasha, with the composition of Murphy, in order to disinfect and solidify liquid waste which will in turn reduce and control odors produced in liquid waste (see Murphy, columns 1 and 2).

***Response to Amendment***

16. With respect to applicant's argument over the 112 2<sup>nd</sup> paragraph rejection of Claim 17: applicant's arguments that Claim 17 is directed to a species of the dopant, and Claim 15 is directed to a species of the adsorption material are persuasive, and rejection is dropped.

17. With respect to Applicant's argument that Mormon discloses a coated adsorbing material, not a doped adsorbent material: Applicant's arguments are considered persuasive, and a new rejection is stated above.
